

PROJECTS:

Audio Visual Lifestyle Solutions is largely involved with big projects for designs of house or architectural structures that require any audio visual implementation.

Whether this be from the conceptualisation stages that could affect the layout of the infrastructure, to the finalised implementation of the Audio Visual equipment supply and installation...Audio Visual Lifestyle Solutions is the number choice when requiring an audio visual team, to finish off the Audio Visual aspect with the highest quality product and service.

A professional team driven on service delivery and time management for deadlines, which are always a reality with any project...project managers can be assured that the team they will be provided with are well groomed and ready to handle any task or glitch that is presented when developing complex infrastructures.

Services guaranteed and not limited to projects are:

- Liaise with architects for conduit design.
- Develop conduit designs on plans.
- Project management for Audio Visual and Electrical services.
- Consultation of products best suited for Audio Visual Design.
- Sales for Audio Visual Equipment.
- Installation of Audio visual Equipment.
- Overall Audio Visual Project delivery and commissioning/handover.
- After sales and installation service.
