

VIDEO WALL:

Video Wall systems have been a big trend in creating that visual impact when walking into a room or retail environment. Video wall systems are a combination of a variety of frameless screens, connected together in varying sizes so as to create one large unified image.

Whether wanting various images to be displayed at one time, or creating one unified image on a large walled surface, anything can be designed to suit your desired outcome.

Video walls are the big trend in retail stores or shopping mall environments, and create the unique display required to attract attention and be visible from all angles. It is the visual appeal of a video wall that creates client interest, and draws attention to your brand.

Audio-visual Lifestyle solutions supply and install video walls ranging in sizes:

- 2 Panel video walls up until 42 Panel video walls.

Whatever your size or requirement, the sky is the limit.
